Water Quality Notice for Mission Residents

ABBOTSFORD - January 13, 2025 - Abbotsford Mission Water and Sewer Services is advising that some Mission residents may notice some discoloration, along with an unusual taste or odour in their drinking water from the Cannell Lake water supply.

Water remains safe to drink and is not a health concern.

At this time, the majority of Mission residents are receiving drinking water from Cannell Lake while maintenance activities are taking place.

Water from this source is regularly sampled and tested and the water quality samples continue to meet Provincial water quality standards.

A carbon filter, such as those from Brita Canada or similar device, may alleviate the smell and taste change.

The Abbotsford Mission Water and Sewer Commission supplies municipal water to Abbotsford, Mission and a small part of the Fraser Valley Regional District. For additional information regarding Abbotsford and Mission's water quality, please visit ourwatermatters.ca/water-quality.

Residents who are impacted may notify the City of Mission at 604-820-3761 of any water quality issues.
